Saussy Burbank at SayeBrook Wins Home of the Year in National Competition

Myrtle Beach, S.C., August 6, 2026 — Regional homebuilder Saussy Burbank's Barrington model at SayeBrook was named Home of the Year at the Gold Nugget Awards, one of the residential development industry's most prestigious juried awards competitions.

The Barrington also received the Grand Award for Best Single-Family Detached Home (2,001–2,499 square feet), while Toll Brothers' Osman model at SayeBrook earned an Award of Merit in the same category.

SayeBrook also earned an Award of Merit in the Gold Nugget Awards' Masterplan Community of the Year category and a Silver Award for Best Mixed-Use Project in the Aurora Awards, presented by the Florida Home Builders Association during the Southeast Building Conference.

"These achievements reflect what can happen when a developer and its builders share the same commitment to creating an exceptional community," said Derek Harris, Vice President of Development for The Jackson Companies. "We're incredibly proud of Saussy Burbank's success, as well as Toll Brothers' Award of Merit, and honored that SayeBrook has joined the ranks of the country's leading master-planned communities. These awards are a testament to the talent, collaboration and dedication of everyone involved."

Michael McAuliffe, President of Saussy Burbank, said the awards underscore his company's commitment to thoughtful design and craftsmanship.

"Winning Home of the Year is an incredible honor for our entire team," McAuliffe said. "The Barrington was designed to demonstrate how timeless architecture, functional living spaces and quality craftsmanship come together to enhance the way people live. We're especially pleased to have achieved this recognition as part of the SayeBrook community and grateful for our partnership with The Jackson Companies."

The Gold Nugget Awards, presented by the California Building Industry Association and Pacific Coast Builders Conference, recognize the nation's most innovative residential, commercial and mixed-use developments. More than 800 entries were considered in this year's competition.
